ESPP Visiting Scholars To Advance Science Grants

The Environmental Science and Policy Program at Michigan State University is pleased to announce a new funding opportunity, Visiting Scholars To Advance Science (VISTAS) grants, designed to increase networking opportunities for MSU faculty, bring world-class experts to MSU, and facilitate development of multi-University research proposals in the areas of environmental science, technology, and policy.

The VISTAS grants aim to provide support for scholars from other universities and institutions to visit MSU to develop externally funded research proposals jointly with MSU researchers. The grants will cover transportation, housing and per diems for the visiting faculty, allowing them to spend quality time to work with MSU colleagues. VISTAS funding is different from typical seminar support programs and feature longer visiting periods, more intensive interactions with MSU researchers, and explicit goals toward grant proposals.

For MSU faculty and researchers, this is a chance to collaborate on proposals, expand professional networks, and enhance the reach of the Michigan State University research brand.

Proposals will be accepted two times a year. The deadline to apply for the fall award is Tuesday, September 30, 2014. The deadline to apply for the spring award is January 31, 2015. Requests submitted at any other time but for one of the two annual deadlines must be accompanied by a justification (e.g. a request for proposals by a funding agency was posted on a short notice).

We expect a typical award to be $3,000 for domestic visitors and $4,000 for international visitors. Requests for up to $10,000 will be considered in special cases when proposals involve multiple visitors or an extended stay. Once awarded, the fund needs to be spent within 6 months, and special justification is required in the application if more time is needed.

Selection criteria include:

1. Nature of the targeted grant. Only interdisciplinary proposals are eligible. Priority will be given to center-type research initiatives.
2. Potential of the proposal to successfully lead to external funding.
3. Expected contribution and academic record of the visiting scholar.
4. Potential impact of the visitors on the broader MSU environmental research community.
5. Relevance to environmental science, technology, and policy.

To apply for the award, MSU researchers must identify the visitors and the target funding opportunities. They also need to submit an itemized budget for the costs of airfare, lodging and per diem, along with the MSU researcher’s and the visitor’s curriculum vitae.

For more information and to apply, contact ESPP at espp@msu.edu.
